

SUPERNEMOS

BIO-INSECTICIDE

Patent pending.

Application and specifications

One pack of 12 million beneficial Nematodes to treat 30m² to 40m² (depending on the pests level) or treat up to 200 pot plants.

SuperNemos (Bio-Insecticide) is a Biological Control product, containing beneficial nematodes (found in healthy soil).

SuperNemos (Bio-Insecticide) destroys common garden insect pests* using a 'Microscopic' Beneficial Insect-Killing Organisms (Nature Controlling Nature).

***Very effective against:** Wireworms, Vine Weevils, Strawberry Root Weevils, Carrot Weevils, Chafer Grubs, Caterpillars, Cutworms, Leatherjackets, Cucumber, Tomato & Potato Beetle larvae, Cabbage Worm, Fungus Gnats Larvae and many more!

NOTIFICATION

This product has been Notified to:
The Department of Agriculture & Food, Pesticides Registration Division, Backweston Campus, Young's Cross, Celbridge, Co. Kildare.

Notification Number: PCS No. 92360

Unlike any other Bio-Control (beneficial nematodes) products sold in the market (which contain only a single beneficial nematode species targeting only one group of pests), SuperNemos targets a range of garden pests.

SuperNemos (Bio-Insecticide) is an environmentally friendly product that is harmless to wildlife, earthworms, bees, bumblebees, pets and children it attacks only target insect pest. There is no need for masks or specialized safety equipment.

Storage and handling

In general, store SuperNemos product in a cool (refrigerator 2-5°C) dry place out of direct sunlight. Do not allow them to freeze or be exposed to extreme temperature.

Application information and tips leaflet enclosed.

ENVIRONMENT FRIENDLY
